

When you install an AQUA-LAWN irrigation system, you are helping to protect the environment.

Did you know?

- ◆ *Plants and turf grass are our most important asset for protecting and enhancing our environment.*
- ◆ *Plants, trees and turf, through the process of photosynthesis, contribute to a reduction in atmospheric CO² while giving back O².*
- ◆ *A healthy 2500 square foot lawn provides oxygen for a family of four.*
- ◆ *The average front lawn has the cooling effect of 10 tons of air conditioning while absorbing green house gases.*
- ◆ *Plants help cool our environment.*
- ◆ *A healthy tree consumes 26lbs of carbon dioxide each year. That is about the same amount spewed by the average car driven 11,000 miles.*
- ◆ *2.5 acres of healthy turf grass sequesters about one ton of carbon a year.*
- ◆ *US lawns remove about 5% of carbon dioxide from the atmosphere.*
- ◆ *Healthy trees, shrubs and lawn around homes create a cooling effect that can help reduce temperatures 7° to 14°.*
- ◆ *Healthy lawns and other landscape planting contribute to improved air quality by acting as traps for dust and other particle matter.*
- ◆ *A well maintained landscape setting is believed to contribute to a persons feeling of well being and decreased emotional tension.*
- ◆ *Landscaping reduces noise pollution by up to 50% in some places.*
- ◆ *Densely planted areas can help protect our fresh water supplies and fragile coasts by absorbing nitrogen and fertilizer runoff.*
